DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: C1, C3, C5, C6, C7, C8, C9, C10ACT, WRITE, RA, CA, D0, D1, D2, D3, Y0, Y1, Y2, Y3, CSL0, CSL1, CSL2 and CSL3 in Figs. 3 and 12; elements 12, 14 and 15 in Fig. 6; elements 41, 42, 43, 45 and 46 in Fig. 7; element 62 in Fig. 8; elements 74 and 75 in Fig. 9; PtWR1, PtWR2, PtWR3 and 206 in Fig. 10; element 301 in Fig. 11. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not understood what C1, C3, C5, C6, C7, C8, C9, C10ACT, WRITE, RA, CA, D0, D1, D2, D3, Y0, Y1, Y2, Y3, CSL0, CSL1, CSL2 and CSL3 in Figs. 3 and 12; elements 12, 14 and 15 in Fig. 6; elements 41, 42, 43, 45 and 46 in Fig. 7; element 62 in Fig. 8; elements 74 and 75 in Fig. 9; PtWR1, PtWR2, PtWR3 and 206 in Fig. 10; and element 301 in Fig. 11 really are since they are not described in the specification.

Therefore, the claimed subject matter as recited in claims 1-31 is not really understood.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-31 are, insofar as understood, rejected under 35 U.S.C. 103(a) as being unpatentable over Hidaka, 6,172,918.

Hidaka, 6,172,918, discloses in Fig. 1 a memory device comprising:
memory cell array blocks;

as shown in Fig. 2, bit line sense amplifier SA, complementary bit line pair BLP, column select gate switching devices CSG activated by column selection line signal Y, data write driver 3aw;

as shown in Fig. 4, column selection line signal Y and write driver activating signal WDE being driven into active state during the same period of time;

the high speed write recovery time is shown in Fig. 13.

What is not shown in Hidaka, 6,172,918, is the features as recited in claims 3, 6-23 and 29-31.

However, since the claimed invention as recited in claims 1-31 are not really understood for the reasons as rejected under 35 USC 112, first paragraph, as set forth above, the features as recited claims 3, 6-23 and 29-31 would have been also rendered obvious under 35 USC 103(a) as being unpatentable over Hidaka, 6,172,918.

Conclusion

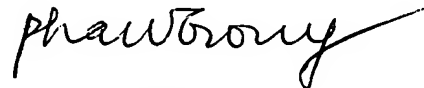

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kawasumi, 6,366,492, Furutani, 5,844,849, Hsiao et al., 6,229,744, and Ozeki, 6,208,580.
